Sample Customer

- The airline on offer places the safety of its passengers and customers at the top of the list of all of its activities. To this end, the airline undertakes measures that exceed the legally prescribed requirements. The accompanying list of these measures is a component of this agreement.
- The airline on offer guarantees the customer special prices for all flights. The accompanying price list is a component of this agreement. The prices indicated do not include value added tax. In the case of a domestic German flight, the respectively valid value added tax will be additionally invoiced.
- The agreement is based on a volume of 100 flight hours within the fixed term. In the event that the envisaged quantity of flight hours is significantly fallen short of or exceeded, the airline on offer reserves the right to subsequent invoicing, respectively, compensation.
- The prices apply subject to the availability of aircraft and travel rights. In the event of the non-availability of a booked aircraft model, the airline on offer will provide the customer with a free upgrade to the next highest category.
- The special prices can also be claimed by all of the subsidiaries of the customer that have been specified to the airline on offer. However, these cannot be sold to third parties.
- The agreement begins on the day of signing by the customer and the airline on offer. It applies for 12 calendar months from the day of signing.
- As for the remainder, the General Terms of Business of the airline on offer apply in their respective valid edition.

Special Measures for the Safety of our Passengers

Introduction of a Process-Oriented Safety Concept in Accordance with the Latest US Standard

As a reaction to the increased terrorist threat to VIP's, the airline has reinforced its already stringent safety measures and adapted them to the latest US standard.

These measures consist individually of:

- Constant surveillance and / or sealing off of all accesses throughout the entire aircraft for the prevention of technical manipulation or the depositing of explosive materials.
- All airline employees have been subjected to a security examination conducted by the authorities
- Identification of the crew by means of "Crew Safety Cards" issued by the Transportation Ministry
- All procedures relevant for security were documented in accordance with processes and inspected for possible weak points.

External Auditing of the Entire Company on a Regular Basis (in accordance with ISO 9000)

Supervision by the aviation authorities is concentrated more on the foundation phase of aviation companies and less on the daily flight operation. This does not fulfill the demands of the airline since we and the airline are of the opinion that while safety indeed costs money, it pays for itself in the long run. For this reason, the airline commissions itself to be audited on a regular basis by an independent, globally active team of aviation experts, thereby guarantying continuous improvement.

Increased Internal Crew Quality Norms

In contrast to practice throughout the market, the airline trains the crews regularly in a flight simulator, the only place where efficient qualification can take place. For this, the airline uses the worldwide flight safety market leader. Via the systematic categorization of pilots, routes and airports, the airline can guarantee that every crew member is up to the demands of the degree of difficulty of their route.

Insurance Protection Significantly Greater than Legally Required

The insurance protection of the airline exceeds the legal requirements and is determined by the demands of the air travelers. The airline can include you by name in the insurance policy and individually adapt your insurance protection to its optimum – anytime. The special policies also insure you in high-risk countries, to which, under certain circumstances, other airlines fly uninsured.

Further Benefits

- Not a sub-charter. Booking the airline means flying the airline. The airline is the owner of its aircraft.
- With the airline on offer, you always fly with a 2-man crew (the Citation Jet can also be flown by one person)
- You are personally accompanied by the Captain in the check-in process!
- Technical safety outfitting of the fleet in accordance with the latest European standard.

The airline on offer, one of the largest in Europe in the business travel sector, can look back on an accident-free history of over 20 years.
